Explanation of Firing Sequences on Gas:

- L-H-O Low fire start (not proven), high fire run, air control by linkage to motorized gas valve.
- Full Mod Full modulation with proven low fire start, synchronized fuel/air control with modulating motor.

Explanation of Firing Sequences on Oil:

- L-H-O Low fire start (not proven), high fire run, oil cylinder air control (reduced input start) with by-passing type nozzle, oil valve and oil pressure regulating valve.
- Full Mod Full modulation with proven low fire start, synchronized fuel/air control with modulating motor, oil by-passing type nozzle, oil metering valve, oil pressure regulating valve.
